

RECALL NOTICE

Armadillo® Filter Machine - Supply Hose Recall

July 26, 2022

Our hose supplier has brought to our attention of a possible premature hose failure where the hose meets the wand portion of your return hose assembly. This certainly could present a potentially dangerous situation and to rectify the issue our supplier, along with Oil Solutions Group, is recalling **all** potentially affected hoses.

If you are receiving this Recall Notice, we have determined that you have a hose that needs to be **removed from service** and replaced with a reconstructed unit. **In an overabundance of caution, we recommend that you stop the use of the hose and the Armadillo filter machine until a (FREE) replacement hose has been provided!**

PART AFFECTED: HOSE DISCHARGE, ARMORED (D1HSE61A)

Shipped as replacement part between March 1st, 2022 - July 20th, 2022 and included on new Armadillo® filter machines with Serial Numbers: **ARM-003157 - 003204**; and **ARM-003697 - 003990**

WHAT SHOULD YOU DO?

The replacement part will come at NO COST to you and will be shipped to the address on file between 1-3 weeks from this notice. It will also not require any tools or mechanical knowledge to install, as the majority of the replacement units will come complete with the blue coupler and return wand attached.

Oil Solutions Group is dedicated to the safety and well-being of our users and apologize for any inconvenience. Our goal is to provide a swift resolution with minimal impact on your business.
