

Masterfil® Envelope Filter Installation & Cleaning

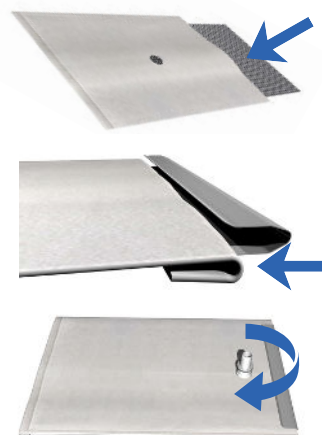

Masterfil® filters are reusable fabric filters designed for easier operations and engineered to extend oil life and improve food quality by removing particles as small as ½ micron. Simply scrape debris out each day and replace filter after 7 days.

Installation

Ensure filter pan is clean and dry.

1. Slide Masterfil® envelope filter onto insert screen aligning hole over threaded stud.
2. Fold down filter and secure folded end with clip.
3. Screw compression cap onto filter assembly threaded stud until snug.

**Equipment may look different based on your model*

Daily Cleaning

Use MasterScoop® and scrape filter at a 90° degree angle, scraping debris to one side and dispose. Ensure bottom side of filter is also scraped.
